

## Spring 2013 Entrepreneurship Speaker Series

The Advanced Technology & Manufacturing Center (ATMC) of the University of Massachusetts Dartmouth presents:

### “Massachusetts Recycling Loans for Recycling and Re-Use”

*By: Nancy M. Gibeau (BDC Capital)*

**Wednesday, March 13, 2013 (12:00 PM-1:30 PM)**

**@ ATMC, 151 Martine St. Fall River, MA 02723**

Administered by BDC Capital, and funded by the Massachusetts Department of Environmental Protection, the Recycling Loan Fund is an excellent way to obtain the financing you need. Loans range from **\$50,000 to \$500,000**, and are used to help Massachusetts businesses active in recycling-related activities obtain the capital needed for any reasonable business purpose. These loans have terms up to ten years and can be used for permanent working capital, refinancing, and real estate, machinery & equipment, and acquisition financing.

#### **Many Types of Businesses Qualify**

Recycling companies, subsidiaries or units that qualify are those whose primary purpose involves:

- Collecting or separating recyclable materials for resale
- Reuse, processing, composting or converting of recyclable materials into marketable products
- Manufacturing products that use recycled materials
- Wholesaling or retailing of recycled feedstocks or products containing a significant percentage of recycled materials.

Our speaker Nancy Gibeau will help us navigate through this unique loan program focusing on specific terms and examples of companies that have and can obtain these loans. Nancy is the Vice President of BDC Capital and covers the state of Rhode Island and southeastern Massachusetts. She has over fourteen years of experience in banking and lending. She most recently served as the Senior Manager of Lending Services for the New Bedford Economic Development Council. Prior to that, she was a Small Business Lender for Compass Bank for Savings. Nancy graduated from the University of Massachusetts at Dartmouth with a B.S. in Management.
